

Suction Unit MB-2000 E5

This high quality brand belongs to the product group “industrial systems”. Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

Suction Unit MB-2000 E5

The suction unit recovers used abrasive media for recycling. By suction force it transports the media from the blast area through the cleaning module back to the vacuumsilo, where the abrasive is stored for reuse. The continuous recycling of abrasive media is a central aspect of economical working and the success of your business.

The MB-2000 E5 enables a recovery rate of 3-14 tons per hour with a maximum (recommended) distance of 45m.

Area of application	stationary and mobile abrasive media recovery system
Total dimension: W x H x D *	2335 x 2380 x 1500 mm
Weight *	2100 kg
Features	cartridge filter (2 cartridges) for 20m ²
Air consumption	32 m ³ /min at 0,5bar
Power consumption	35 kW
Electrical specification	3x 400V, 50Hz

* +/- Values, may differ depending on configuration, arrangement and function.
