

Vacuum System MB 220 E3 with recycling system

This high quality brand belongs to the product group “industrial systems”. Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

Vacuum System MB 220 E3

The suction unit recovers used abrasive media for recycling. By suction force it transports the media from the blast area through the cleaning module back to the silo, where the abrasive is stored for reuse. The continuous recycling of abrasive media is a central aspect of economical working and the success of your business.

The MB 220 E3 enables a recovery rate of 4 tons per hour.

Area of application	abrasive media recovery system
Total dimension: W x H x D *	650 x 1765 x 1215 mm
Weight *	295 kg
Features	cartridge filter for 2,5m ²
Air consumption	220 m ³ /h at 0,27bar
Maximum blast hose length	10m (recommended)
Power consumption	5,5 kW
Electrical specification	3x 400V, 50Hz
* +/- Values, may differ depending on configuration, arrangement and function.
